

Problem: A.2.10 There are no Sequence methods(ended, triggered, matched) in the BNF

### Replace in 16.13.6 Sequence methods

There are three methods available to identify the end point of a sequence: ended, triggered, and matched. These methods are invoked using the following syntax:

```
sequence_instance.sequence_method
```

WITH

There are three methods available to identify the end point of a sequence: ended, triggered, and matched. The syntax is as shown below: ~~These methods are invoked using the following syntax:~~

```
sequence_instance.sequence_method
```

---

```
sequence_method_call ::= // from A.2.10  
    sequence_instance . sequence_method_name
```

```
sequence_method_name ::= ended | triggered | matched
```

---

*Syntax 16-~~<Note to editor: put correct number>~~—Sequence method syntax (excerpt from Annex A)*

Append to the end of A.2.10

```
sequence_method_call ::=  
    sequence_instance . sequence_method_name
```

```
sequence_method_name ::= ended | triggered | matched
```
