

Objective

The subclause 16.14.3 is inconsistent with 1683. E.g., 16.14.3 forbids changing clock across an overlapping implication, while changing clock there is now legal.

16.14.3 Clock flow

DELETE

~~Clock flow eliminates the need to write clocking events in positions where the clock is not allowed to change. For example:~~

~~@(c) x |-> @(c) y ##1 @(d) z~~

~~can be written as~~

~~@(c) x |-> y ##1 @(d) z~~

~~to reinforce the restriction that the clock not change across |->. Similarly,~~

~~@(c) **if** (b) @(c) w ##1 @(d) x **else** @(c) y ##1 @(d) z~~

~~can be written as~~

~~@(c) **if** (b) w ##1 @(d) x **else** y ##1 @(d) z~~

~~to reinforce the restriction that the clock not change from the boolean condition *b* to the beginnings of the **if** and **else** clause properties.~~
